

HOW TO CLEAN AND PROTECT ELECTRIC HOTPLATES

For this maintenance project, you will need:

- ✓ A sponge
- ✓ Hotplate protectant
- ✓ Microfibre cloth

1. First, ensure the stove top is turned off, and cool.
2. Using a nylon sponge, scrub off any dirt, rust, or food residue before wiping clean.
3. Apply hotplate protectant, following the instructions from the manufacturer.
4. Once a thin, even coating has been applied, use a clean microfibre cloth to buff off the excess.
5. Turn on the hotplate, allowing it to heat up until any residue has burnt off.
6. Repeat with remaining hotplates.

Ensure the
stovetop is
turned off and
cool!

HOME IN PLACE TENANTS PLEASE REFER TO YOUR
RESIDENTIAL TENANCY AGREEMENT TO SEE IF THIS TYPE OF
MAINTENANCE IS YOUR RESPONSIBILITY.
