

HOW TO REMOVE, KILL AND PREVENT MOULD IN YOUR HOME

For this maintenance project, you will need:

- ✓ Vinegar or methylated spirits
- ✓ A spray bottle
- ✓ Consumer grade mould spray
- ✓ Paper towel
- ✓ Moisture absorber
- ✓ Baking soda

1. Consumer grade products are available, which can provide a simple solution to tackle mould around your home.
2. Alternatively, vinegar or methylated spirits can be used in an 80% water to 20% chemical solution.
3. With your product of choice, spray the effected area, wiping with paper towel and disposing of Immediately.
4. Utilise disposable dehumidifiers to absorb moisture from the air.
5. Alternatively, bi-carb soda can be pleased in a small bowl, which will harden once moisture has been absorbed. Replace as required.
6. Open blinds, curtains, windows and doors when possible to increase ventillation, reducing the chance of mould developing.

Take care when
using chemicals,
always utilise
appropriate safety
equipment
